June 18 -  
June 29

To be tabled at FAC.  
Also correlated to this request) pl. see  
the possibility of sems 1, 3, 5 and 7 repeat  
students from 14<sup>th</sup> batch going for the 2019 convocation  
according to the present timetable.  
i.e; what is the earliest date for  
convocation such that above scenario can be  
accommodated? This will also help the plight of  
following students too.

04/09/2018

To: Prof Nalin Wickramarachchi,  
Dean  
Faculty of Engineering,  
University of Moratuwa.

Through: Prof J.M.S.J. Bandara,

Head of the Civil Engineering Department,  
University of Moratuwa.

Recommended as there is no guarantee that the  
results of next semester 3  
will be released on  
time.

Dear Sir,

Requesting a repeat exam for semester 3 Structural analysis II.

This is relevant to the previous letter attached here. The results of the semester 3 repeat structural analysis II exam was issued during our intern period. The results of five of us were displayed as "data" in the display board. When we asked from the examination division regarding the matter they informed that the result "data" is issued as they don't have the marks of the continuous assessments and not because of any other issue and once the continuous assessments marks are obtained they will issue the results and it won't matter. When we went to obtain results sheets, they were not issued at the time. Recently two of us went to obtain the result sheets again and then the results sheets were issued, and it showed that all five of us has got "I-we" for the subject. By the time we got to know that this year semester 3 exams are over and therefore all five of us will miss the chance to graduate next year with our batch mates. At least if the Moodle is updated on time with results we would not have gotten in to this trouble. We kindly request you to reconsider the decision as it is not satisfying and do a justice for the following students.

Thank you.

Yours faithfully,

Dear Sir,

**Addressing the problem with results of semester 3 Structural Mechanics II (CE2013) examination.**

Following students have written structural mechanics II (CE2013) as a repeat examination in 2017. And the results was displayed for these following students as "DATA" in 2017(during training period). Since there is a problem with the results, they have address the examination division. And reply was it is need to add continues assessment results, no need to worry about that. But the final results was not displayed.

On last Thursday (21/06/2018) these students have requested the results sheets. And it was shown that they have received "I-WE" for this Module. Since there is no more semester 3 examinations before they graduate, they cannot pass out with their respective batch (14<sup>th</sup> batch).

So these students kindly request re-correction for this module if possible, or a markup exam during their semester 7 or 8. (July-December 2018).

Please kindly consider this matter and give reasonable response to these students.

Thank You.

Yours faithfully,

*It is strongly recommended to consider student request on markup examination if students failed in this subject after re-correction.*
